# Our Mission

For Loxone to be able to take care of thousands of different tasks and processes through intuitive automation. Whether in your own home, a commercial environment or for a custom application. Creating automation with Loxone saves time and gives peace of mind knowing that everything is under control.

**Our mission is to bring this to the world.**

**Martin Öller &  
Thomas Moser**  
Founders

"The original idea was to make it simple, smart, yet affordable! That the lights in the bedroom turn on when you have to get up - without having to fumble for a switch. That the blinds adjust depending on the position of the sun - that the heating also thinks for itself and lowers when a room is warm enough..."

**Rüdiger Keinberger**  
CEO

# Create Automation

Loxone is a complete automation solution with intuitive control - suitable for smart homes, commercial premises and custom applications.
